

INTERNAL COMMERCE IS WELL SUSTAINED

Staple Commodities Held
Their Own Last Year.

LARGE EXPORT OF WHEAT

Increase Not Confined to Northwest,
But Is Evident Also on
Pacific Coast.

Reports relating to the internal commerce of the United States for eleven months ending with November, as presented by the Department of Commerce and Labor, through its bureau of statistics, show in general that staple commodities at primary markets have thus far this year held their own, compared with the movements of 1902. Grain and live stock receipts at leading centers have, as a rule, reached, if not exceeded, last year's level. To the end of November, 7,882,262 head of cattle were received at five leading markets, compared with 6,944,719 head for the corresponding period of 1902. Receipts of all kinds in the eleven months were 23,965,574 head in 1903 and 23,478,442 head in 1902.

Wheat Movements.

Wheat movements continue to be influenced by falling demands. Up to the close of November, Minneapolis was reported as still drawing wheat from winter wheat territory as far south as Oklahoma. Large quantities of flour have been going out from Minneapolis to China and Australia. Total shipments, domestic and foreign, from Minneapolis in November, 1903, were 2,073,106 barrels, compared with 3,192,690 in 1902. This increase is not confined to the Northwest, but on the North Pacific coast as well. Milling demands have kept up the price of wheat to the level which has materially restricted exports. In spite of the lowest ocean grain rate on record between the Pacific coast and Europe, transshipment from the Southern hemisphere have come to the front, and will be materially influencing the world's market of wheat for the rest of the crop year.

Anthracite Coal.

Anthracite coal shipments in November amounted to 4,091,147 tons, compared with 3,825,642 tons in October, and 4,984,384 tons in November, 1902. For eleven months this year 55,081,064 tons were shipped, compared with 56,101,569 tons in 1902, and 49,890,001 tons in 1901. Other coal shipments were reported as follows: Pennsylvania Railroad lines east of Pittsburgh and Erie (forty-seven weeks), 37,573,212 tons, of which 8,568,510 tons were coke, 25,831,237 tons bituminous coal, and 3,225,155 anthracite. Chesapeake and Ohio Railroad reported 4,835,971 tons of coal and coke to the end of October, 1903, compared with 3,429,967 tons in 1902. Southern Railway shipments for nine months this year were 2,797,667 tons, against 2,672,541 tons in 1902. Seven railroads in Ohio reported a coal tonnage of 11,782,221 tons in ten months ending with October, 1903, and 11,885,576 tons in 1902. St. Louis receipts for eleven months, 1903, were 5,129,577 tons, compared with 4,734,421 tons in 1902, and Chicago received 3,883,326 tons of coal and coke in ten months, compared with 7,098,868 tons in 1902.

PAPERS OF MR. POLK ADDED TO LIBRARY

A collection of private papers of the late James K. Polk, eleventh President of the United States, has been added to the historical papers now in the Library of Congress. The collection deals with a most interesting period in the history of the country and includes correspondence of the late President with many noted persons, manuscript speeches, campaign literature and other matter.

President Polk's long political career brought him into many interesting public relations and the addition of his papers to the collection of similar matter in the Library will be of much interest to students and historians.

"HYPNOTIC MURDER," SAY HEIRS CUT OFF

Spiritualist Neighbor, in Whose Favor
Paris Woman Made Will, Is
Accused.

PARIS, Jan. 4.—Paris is deeply interested in the alleged hypnotic murder of a woman named Chappuis, sixty-one years old, whose surviving relatives include Leon Grease, an operative conductor; Lieutenant Girardot, of the army, and M. Toutain, a bank officer.

M. and Mme. Martin, who are spiritualists, were neighbors of Mme. Chappuis. It is alleged that Mme. Martin obtained a commanding influence over Mme. Chappuis, with the result that Mme. Chappuis made a will in her favor, cutting off her natural heirs.

Mme. Chappuis died and was buried. On complaint of her relatives the body was exhumed, but no trace of poison was found in the stomach.

Mme. Martin has been arrested, and witnesses have testified to her being in control over the dead woman, but it is not believed she will be prosecuted, unless facts are developed showing that she physically brought about the death of Mme. Chappuis.

MEDICAL DISCOVERY MAY PROMPT RESEARCH

BOSTON, Jan. 4.—Dr. J. M. Wright, director of the pathological laboratory of the Massachusetts General Hospital in this city, has announced the discovery that "tropical ulcer," a peculiar skin affection, is caused by micro-organisms of the protozoan classification.

The conclusion is the same as that recently reached by Dr. Frank Burr Mallory, of Harvard University, with reference to scarlet fever, and it is thought that the discovery of these physicians will prompt research in a new field.

STUEBENVILLE, Ohio, Jan. 4.—At the Labeled Iron Works here, where a general wage reduction of 20 per cent was proposed when the open-hearth department is reopened, the workmen have rejected the proposition. The foundry men have also rejected it. About 1,500 men are affected.

GOVERNMENT RECORDS IN CONSTANT DANGER

Supervising Architect Taylor, of the
Treasury Department, Urges Nec-
essity of Greater Precautions.

The new regulations adopted by the District Commissioners for the prevention of fire and panic in theaters and office buildings may also bring about a change in the arrangements of the Government for the preservation of records and other official documents. The great peril in which priceless records now are because of danger of fire has been related by Supervising Architect Taylor, of the Treasury Department.

"The Government pays in rentals for department space about \$250,000 annually," said Mr. Taylor, "that sum represents 2 per cent on about \$13,000,000. If the Government would raise \$10,000,000 by issuing 2 per cent bonds and use the money in constructing new buildings it would furnish all the space required for the departments for many years to come and save annually thousands of dollars now paid out in heavy rentals. There is not a department building in Washington whose records are not exposed to destruction by fire, and the necessity for better storage facilities is generally recognized.

"The last Congress made a small appropriation which was to be expended upon plans for a Hall of Records to cost \$2,500,000, but there is no telling when the appropriations for the building will be authorized, so slowly does Congress move in such expenditures."

The danger from fire in the department buildings, Mr. Taylor says, arises from the fact that in each of them are long corridors and rooms filled with official papers, which flames from a spark could sweep out of existence in a few minutes. The great increase in the records in the last few years is the principal reason why they are not more securely preserved. In many cases residence buildings have had to be rented for office use.

TALK ON GOOD ROADS PROMISED BY BROWNLOW

Representative to Address Automobile
Club in New York on His
Pending Bill.

Representative W. P. Brownlow of Tennessee, author of the good roads bill now before Congress, has accepted an invitation to speak at the banquet of the Automobile Club of America, of January 23 in New York city. Col. Albert A. Pope will be another prominent speaker. It is expected the banquet will prove the most important gathering of automobilists in the history of power-driven machines.

Incidentally the dinner is expected to give additional strength to the fight for the passage of the Brownlow bill. Albert R. Shattuck, of the good roads committee of the club, is working steadily and is now getting the support of the farmers through his convincing literature relative to the good to be obtained from the bill as a law.

The club has sent a letter stating that the bill proposes to appropriate \$24,000,000 as Federal aid for the improvement of wagon roads. The States or counties and towns receiving this aid must contribute a like sum, so that \$48,000,000 will be spent in road improvement. If passed, the bill would mean the building of from 100 to 500 miles of road in every State.

The club also advocates the placing on this road and all main roads signposts, erected under the State law, and the universal adoption of the money system in repairing roads in place of the wasteful day labor system now largely in use.

The club has appropriated \$2,500 for next year's work in this direction, and Mr. Shattuck is endeavoring to secure additional subscriptions to carry on the work.

DYING MAN GAVE BODY FOR STUDY OF RADIUM

Doctors Will Dissect Cancerous Throat
and Tongue of Patient Treated
by Metal.

BALTIMORE, Jan. 4.—Physicians of Dr. W. Whitney, a cancer patient, who died of pneumonia while being treated by radium for the cancerous growth, will dissect the tongue and throat, they were authorized to do by Mr. Whitney, to ascertain the results of the treatment.

Mr. Whitney began the radium treatment, under the advice of leading Philadelphia specialists, for cancer of the tongue, caused by its incineration from a decayed and broken tooth.

The progress of the case had all but confirmed the physicians that a cure existed in radium. Three weeks after the daily application of the mysterious metal, two roots of the cancerous growth were extracted, and the other roots, it was believed, would have yielded soon to the treatment.

Mr. Whitney, who was a merchant of Cantonville, a suburb of this city, requested the physicians to make such disposition of his body as they saw fit in the interest of science.

DYNAMITE EXPLODED WHILE DANCE WAS ON

PERTH AMBOY, N. J., Jan. 4.—Scores of men and women were injured, some so severely that they will die, by an explosion at Keasby, a Hungarian settlement near this city.

There are reasons for believing that a large amount of dynamite was exploded under the floor of a hall in which a celebration was being held by an enemy of the Hungarian cause. The president of Wofford College, Spartanburg, S. C., was being given by a benevolent society, to which belonged almost the entire Hungarian colony about Perth Amboy.

"SOME VISIONS OF LIFE" was the subject of an interesting discourse by Dr. H. N. Snyder last night before the congregation of Trinity Methodist Episcopal Church. Dr. Snyder is president of Wofford College, Spartanburg, S. C.

ISLAND HOME FOR ZION IS DOWIE'S PROJECT

Elijah Looks Over 300,000 Acres Near
New Orleans and May Buy
the Tract.

NEW ORLEANS, Jan. 4.—Alexander Dowie, the self-styled Elijah, reached this city last night in private car No. 99 of the Arkansas Pass Railroad. Assistant General Passenger Agent Lupton, of that road, is personally conducting him. Dowie has been misleading the newspaper men, and his real objective point was not made known until after he arrived here, and that by accident. He is going to Arkansas Pass to look over Matagorda Island, with the idea of purchasing it. This island contains 20,000 acres, and if he buys the whole tract he will remove the "eternal city" from the shores of Lake Michigan to that island.

General Passenger Agent Anderson, of the Southern Pacific, has ordered that every facility be given Dowie for making the trip to Arkansas Pass comfortably and quickly. If he buys the island 20,000 families will be moved to that part of Texas as soon as possible. If he does not buy it, he will continue on to Australia, where he will probably buy an island for the same purpose.

TO BE TRIED BY COURT-MARTIAL

Lieut. Richard Goling, of the Fifteenth Infantry, is to be tried by a court-martial at Fort Ethan Allen, Vt., today, for conduct unbecoming an officer.

BAPTIZED IN RIVER; TEMPERATURE ZERO

Nine Converts Undergo Icy Immersion
in the Susquehanna at Steel-
ton, Pa.

STEELTON, Pa., Jan. 4.—With the thermometer registering zero, the Rev. Charles Lambert, pastor of the Zion Baptist Church, Steelton, baptized nine persons, seven men and two women, negroes, through a hole in the ice in the Susquehanna River this morning.

Dr. Lambert, speaking seriously, declared that, standing waist deep in the ice-covered Susquehanna, he passed to the preparation from his brow. Observation of the rite was delayed until a large opening was cut in the ice, which was seven inches thick. Coming from the water, the immersed persons entered carriages and were hurriedly driven to their homes.

Dr. Lambert proposed to defer the baptisms because of the extreme weather, but the nine faithful converts unflinchingly protested against such action.

"It was the best evidence of faith I have ever seen," remarked the devout minister.

MOCCASIN OFF BEACH.

Dispatches from Norfolk announce that the wrecking tug Rescue and Hercules have succeeded in dragging the wrecked submarine boat Moccasin from its resting place on the beach near Currituck Inlet, N. C., and hope to float the vessel in a few days.

AWOKE IN BOSTON TOWN AFTER DRINK IN GOTHAM

Missing Captain of Indrawadi Found
at Last Near Baltimore.

BALTIMORE, Jan. 4.—Capt. Harry J. Porter, commander of the British steamship Indrawadi, whose mysterious disappearance in New York December 14 created a sensation, has been found in Orangeville, a suburb of this city, at the home of C. L. Moores.

Captain Porter says he left his ship on the morning of December 14 to go to the office of Funch, Eddy & Co., intending then to go to the customs house for clearance papers. Soon after leaving the ship, he says, he met a number of men, and was invited to take a drink.

The next thing he knew he was in a strange hotel in Boston. He was alone, and he learned he had been there three days. He discovered that his ship, after waiting two days, had sailed. Then he came here to his friend's house to await developments.

U. S. CONSUL AT MOSCOW DENIES A HEALTH RUMOR

MOSCOW, Russia, Jan. 4.—United States Consul Smith has issued a statement denying that he is co-operating with Kisel Zagoranski (licensed by the Russian medical department to practice medicine in cases of tuberculosis) in treating consumptives, and saying that the cases brought to his notice have not demonstrated the possibility of curing tuberculosis by the Zagoranski method.

WOMAN DRINKS ACID ON DAUGHTER'S GRAVE

Mrs. Goodell Dies in Ambulance While
on Way to Hospital.

CLEVELAND, Jan. 4.—Mrs. Nellie Goodell drank a potion of carbolic acid while kneeling on her daughter's grave in Lakeview Cemetery here yesterday afternoon, and died in the ambulance while being taken to the hospital.

She came here two years ago from Chicago, where she had been employed as head of department in the Fair Department Store, and ever since had resided with her sister, Mrs. R. S. Bonar, 120 Whitney Street.

Her daughter, Golden Ray Goodell, eighteen years of age, died in August, 1902, and the woman had grieved over her death. Golden Ray had just been graduated from the Chicago University of Music. Mrs. Goodell tried to commit suicide here last July in the Frankfort Hotel by inhaling illuminating gas, but she was discovered in time and revived.

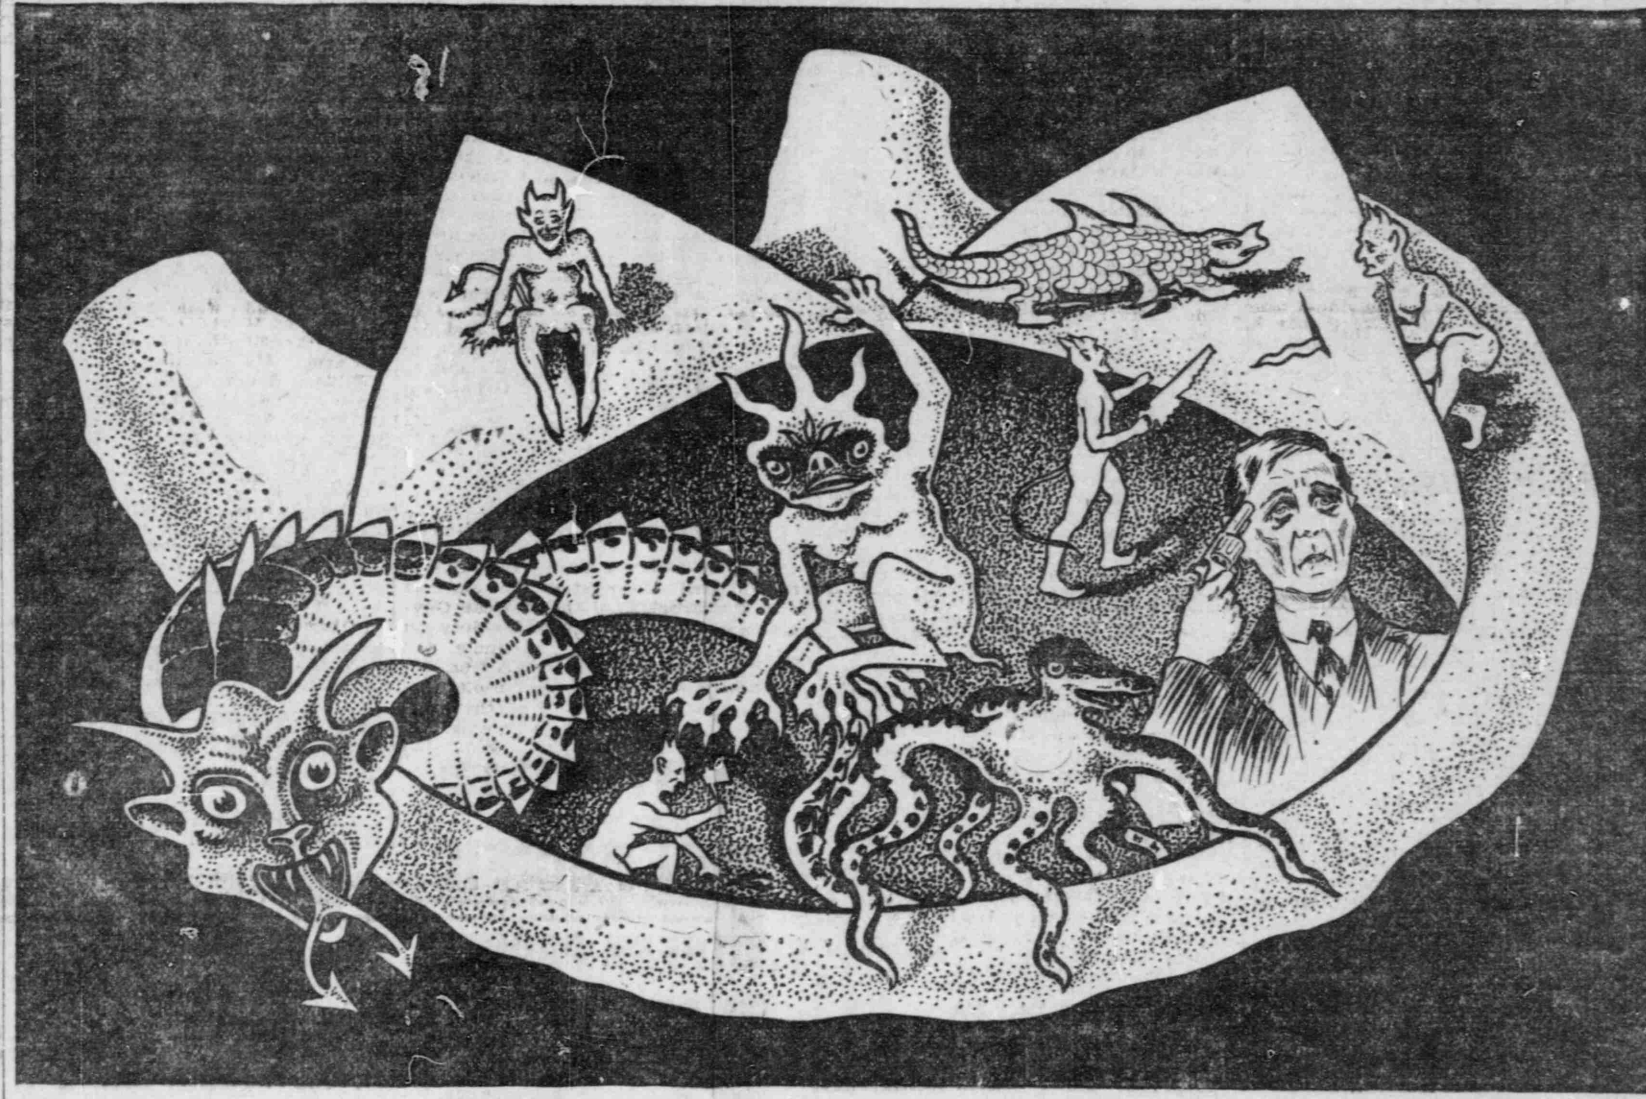

DESTROYER LAWRENCE NOT SERIOUSLY DAMAGED

Admiral Sands has advised the Navy Department, from Key West, that the torpedo boat destroyer Lawrence was not seriously damaged last week in its collision with the steamer Oliveette.

The Lawrence is seaworthy, and can be sent immediately to a northern shipyard in case it is not found practicable to repair its injuries at Key West.

The Worst Stomachs in the World

Are Being Cured Daily by Stuart's Dyspepsia Tablets—They Are Safe,
Certain, and in Reach of All.

DOES YOUR STOMACH FEEL LIKE THIS?

When That Organ Declares War
Against the Rest of the Body,
There Is Always Plenty of
Trouble.

There is very little comfort or happiness on this earth for the individual whose stomach is at war with all the other organs of his body. The human body is called the habitation of the soul, but both body and soul suffer greatly when the stomach refuses to act in harmony with the rest of the system and dyspepsia is established. The functions of all the body and the brain itself are so intimately dependent on those of the stomach that when that organ, for any reason, ceases to perform its duties, the trouble becomes general, and great mental and bodily suffering always results. Under such conditions there is only one thing to do and only one way to do it. The stomach must be pacified and pacified in the right way.

Stuart's Dyspepsia Tablets are the only safe, reliable, certain remedy for all stomach troubles. The reason is they are the only perfect, natural remedy. They perform the digestive work of the stomach just as the stomach did when it was able, and do it in exactly the same way. Their principal component elements are identical with those of the gastric juice and other digestive fluids of the stomach. They do the work of the stomach in a natural way without causing any disturbance and thus permit that organ to rest and recuperate and grow strong and well. That is what they do, and that's the way they do it. Anybody who understands it, and anybody suffering from dyspepsia or any stomach trouble can always get safe and certain and natural relief from Stuart's Dyspepsia Tablets.

Stuart's Dyspepsia Tablets are for sale by all druggists at 50 cents a box. Buy a box and then go and eat a good square meal and then take a tablet and note the result. You will forget all about it if you are not careful, for there will be no pain nor disturbance, and the food will be digested just as it used to be when your stomach was well and strong. Furthermore, your stomach will soon be well and strong again if you keep on taking them, just as thousands upon thousands of other stomachs have been made well and strong by the exclusive use of Stuart's Dyspepsia Tablets.

LET YOUR STOMACH HAVE ITS OWN WAY.

Do Not Try to Drive and Force It to
Work When It Is Not Able or
You Will Suffer All
the More.

You cannot treat your stomach as some men treat a balky horse—force, drive, or even starve it into doing work at which it rebels. The stomach is a patient and faithful servant and will stand much abuse and ill treatment before it "balks," but when it does you had better go slow with it and not attempt to make it work. Some people have the mistaken idea that they can make their stomachs work by starving themselves. They might cure the stomach that way, but it would take so long that they would have no use for a stomach when they got through. The sensible way out of the difficulty is to let the stomach rest if it wants to and employ a substitute to do its work.

Stuart's Dyspepsia Tablets will do the work of your stomach for you and digest your food just as your stomach used to when it was well. You can prove this by putting your food in a glass jar with one of the Tablets and sufficient water and you will see the food digested in just the same time as the digestive fluids of the stomach would do it. That will satisfy your mind. Now, to satisfy both your mind and body, take one of Stuart's Dyspepsia Tablets after eating—eat all and what you want—and you will feel all about having a stomach, just as you did when you were a healthy boy or girl.

Stuart's Dyspepsia Tablets act in a natural way because they contain only the natural elements of the gastric juices and other digestive fluids of the stomach. It makes no difference what condition the stomach is in, they go right ahead of their own accord and do their work. They know their business, and surrounding conditions do not influence them in the least. They thus relieve the weak stomach of all its burdens and give it its much-needed rest and permit it to become strong and healthy.

Stuart's Dyspepsia Tablets are for sale by all druggists at 50 cents a box. They are so well known and their popularity is so great that a druggist would as soon think of being without them as a business man would lose confidence in him. The demand for them is so great and universal that it would be a very short-sighted policy on the part of any druggist to be without a good supply of Stuart's Dyspepsia Tablets.

ARE YOU LOOKING FOR TROUBLE?

If You Have Dyspepsia, You Don't Need
to Look Far—It's Always
With You.

There is no fun in having dyspepsia. You feel as if the whole of creation were in a conspiracy to make you miserable, and you proceed to get sour on the whole of creation accordingly. Nothing goes right. Everything goes wrong. You are cranky, morose, disagreeable, and out of sorts.

There is only one thing for you to do, and that is to invest 50 cents in a box of Stuart's Dyspepsia Tablets and get happy right away. They will make you forget you ever had a stomach and spirits will rise rapidly. They take up the work that your stomach is unable to perform and carry it on just as a well, sound stomach would. Their essential ingredients are identical with the gastric juice and other digestive fluids and their action is, therefore, natural and beneficial in all respects.

Stuart's Dyspepsia Tablets by thus relieving the stomach of its burden permit it to rest, recuperate, and rebuild its wasted tissues. Nature is very rapid in its work of restoration where it is not interfered with. Stuart's Dyspepsia Tablets prevent all interference. No matter how much you eat, the stomach is not permitted to digest the food at all. They do the work themselves, and do it regardless of the condition of the stomach. They act independently and are not influenced by surrounding conditions.

Stuart's Dyspepsia Tablets are for sale by all druggists throughout the land at 50 cents a box. No druggist would think of being without them, as his customers would recognize his inferiority in a business way and lose confidence in him. The demand for them is so great and universal that it would be a very short-sighted policy on the part of any druggist to be without a good supply of Stuart's Dyspepsia Tablets.

AN OLD, OLD FABLE.

Aesop, Twenty-five Hundred Years Ago,
Recognized the Importance of
the Stomach.

"The members of the body once rebelled against the belly, who they said led an idle, lazy life at their expense. The fable declared that they would not again lift a crust, even to keep him from starving; the result, that it would not take a bit more food; the legs, that they would carry him about no longer, and so on with the others. The belly quietly allowed them to follow their course, well knowing that they would all soon come to their own senses, as, indeed, they did, when, for want of food and nourishment supplied from the stomach, they found themselves becoming mere skin and bone."—Aesop's Fables.

The above fable was written 2500 years before the birth of Christ and shows that the importance of the stomach and its functions were recognized even in that remote age. It is just as true today. The moment the stomach, for any reason, ceases to perform its work, the rest of the body and the brain itself suffer serious consequences. The stomach then must be appeased or released of its burden.

Stuart's Dyspepsia Tablets perform the latter function. They actually do the work that the weak and worn-out stomach is unable to do. They digest the food and supply the body with the necessary nourishment just as a sound stomach would do. They contain all the necessary properties of the gastric juice and other digestive fluids of the stomach and act exactly the same on the food as those fluids do.

The work of Stuart's Dyspepsia Tablets is, therefore, natural and most beneficial. By relieving the stomach of its burdens they permit it to rest and recuperate and regain its normal healthy condition. They are the best and most efficient of all dyspepsia cures for these reasons. Stuart's Dyspepsia Tablets are for sale by all druggists at 50 cents a box throughout the land. No drug store is complete without them, and the druggist can no more afford to be out of them than quinine or alcohol. The demand for them is so universal and their merits are so well known that the druggist who fails to keep them would be regarded as below the standard and his business would suffer as a result.

LOAN COMPANIES.
MONEY
For everybody at rates lower than the lowest. Don't be misled by us and investigate. Business strictly confidential. No one knows of your transactions with us. We lend on furniture, pianos, or salary. If you have a loan now anywhere and need more money, come to us. Nothing deducted from loan. 10% get full amount. Extensions on in case of sickness without extra charge.
